Corporate Capabilities

System Virtualization

Quayle Consulting can migrate the following systems to virtual platforms running under Windows or OpenVMS:

- VAX servers
- VAX workstations (“VAXstation”)
- Alpha servers
- Alpha workstations (“AXPstation”)
- PDP-11

Embedded solutions are available using the Logical Company's NuVAX products in partnership with Salem Automation, Inc.

Data Migration Services

Quayle Consulting can read all common VMS tape formats, such as TK-50, TK-70, 9-track, 4 mm, QIC, DLT and 8 mm. Data can be converted for use with Windows, Linux and Unix, or migrated into a virtual VAX or Alpha environment.

System Administration Services

Quayle Consulting specializes in system administration services for VMS systems on:

- VAX
- Alpha
- Itanium (including HP Integrity Server)
- CHARON virtual platforms

Quayle Consulting also provides system administration services for Linux and Unix systems.

Service is available on a retainer or as-needed basis, on-site or via remote access.

Software Development

Quayle Consulting specializes in custom software development with the following languages:

- C
- C++
- Fortran
- Assembler languages, including VAX Macro and Motorola 68000

Quayle Consulting also sells and supports the **DOS Buttons** product, which provides windowing capabilities for low-cost embedded DOS systems.

Training Services

Quayle Consulting can provide training in:

- CHARON software installation and migration
 - CHARON ongoing maintenance for support staff
 - Software development
 - System management
-
